UNIVERSITY OF GUELPH: CENTRES, INSTITUTES AND GROUPS FOR RESEARCH, INNOVATION AND COMMERCIALIZATION

The University of Guelph is home to a wide range of research facilities, many of which can provide valuable service to business, industry and the not for profit sector. Projects undertaken in partnership with the University are often eligible for federal or provincial funding. Confidentiality agreements and the protection of intellectual property can be organized through the Catalyst Centre.

Except where noted all extensions can be reached by dialing **519-824-4120**.

ADVANCED ANALYSIS CENTRE

The Advanced Analysis Centre is comprised of a group of high-end specialized research laboratories (NMR, x-ray diffraction and scattering, microscopy imaging, fermentation, mass spectrometry and genomics). The AAC provides an unequalled range of capabilities for research and advanced education at the interface of the physical and biological sciences.

Contact: *Debbie Chan, Manager Ext. 56814*

AGRICULTURE AND FOOD LABORATORY (AFL)

Analytical testing services in a range of fields spanning plant pathology and pesticides residues, to microbiological and allergen testing for the food, agriculture and environment sectors, as well as government and researchers. In addition, we are accredited by SCC and CALA to ISO/IEC 17025 for specific tests listed on our scopes of accreditation.

Contact: *John Melicherick 519-823-1268 ext. 57242*

AGRI-TECHNOLOGY COMMERCIALIZATION CENTRE

Focuses on developing and commercializing innovative technologies and products that have an agricultural foundation, including bioproducts (bio-fibres, biooils, and other commercial/industrial bioproducts), clean energy (biomass, biodiesel), agri-health (nutraceuticals, agri-foods), agri-waste management and other agriculturally based innovations that will help establish and sustain Ontario's leadership position in global markets.

Contact: *Tiffany King, Executive Administrator, 519-821-2960 Ext. 244*

ANIMAL HEALTH LABORATORY (AHL)

Specializes in determining the health of livestock, poultry, horses and pets through a wide array of tests, and in turn provides disease surveillance data for the province of Ontario.

Contact: *Grant Maxie Ext. 54544*

AQUACULTURE CENTRE

Co-ordinates research, extension and educational activities to facilitate information and technology transfer to the private sector and contribute to the economic and environmental sustainability of aquaculture.

Contact: *Rich Moccia, Director, Ext. 56216*

AXELROD INSTITUTE OF ICHTHYOLOGY

Promotes the development of graduate teaching and research, supports international teaching and research, as well as editing and publishing activities relating to fish biology.

Contact: *Jim Ballantyne, Director, Ext. 52708*

BIODIVERSITY INSTITUTE OF ONTARIO

Takes the lead role in an international consortium whose goal, over the next 20 years, is to develop a molecular bar code for every multi-cellular species on the planet.

Contact: *Paul Hebert, Director, Ext. 56250*

BIOPRODUCTS DISCOVERY AND DEVELOPMENT CENTRE

Produces greener bioproducts as substitutes for non-renewable materials in many manufacturing sectors, consumer goods and services.

Contact: *Amar Mohanty, Director, Ext. 56664*

CAMPBELL CENTRE FOR THE STUDY OF ANIMAL WELFARE

Promotes animal welfare through research and education.

Contact: Tina Widowski, Director, Ext. 52408

CANADIAN ADAPTATIONS OF SHAKESPEARE PROJECT (CASP)

CASP is the first research project of its kind devoted to the systematic exploration and documentation of the ways in which Shakespeare has been adapted into a national, multicultural theatrical practice. Originally launched in 2004. CASP Version 2 was released in 2007 offering more than double the content, including learning, teaching, multimedia, and research resources and pedagogical tools related to how Shakespeare has been adapted into (and out of) Canadian theatre. CASP Version 2 reflects the project's ongoing commitment to blending the best practices of humanities research, new media, online publishing, accessibility, and community engagement.

Contact: Daniel Fischlin, Research Chair, x53267

CANADIAN ARTHRITIS NETWORK PRECLINICAL LABORATORY

Addresses preclinical research and development as well as early clinical trials.

Contact: Mark Hurtig, Clinical Studies, x54028

CANADIAN CO-OPERATIVE WILDLIFE HEALTH CENTRE

Maintains surveillance and diagnosis of diseases in wild animals as a collaborative activity of Canada's four veterinary colleges.

Contact: Doug Campbell, Pathologist, Ext. 54556

CANADIAN LANGUAGE AND LITERACY RESEARCH NETWORK

Generates, integrates and disseminates bias-free scientific research and knowledge that is focused on improving and sustaining children's language and literacy development in Canada.

Contact: Jennifer Starcok, Managing Director, 519-850-2901

CANADIAN POLLINATION INITIATIVE

Addresses the growing problem of pollinator decline in agricultural and natural ecosystems in Canada. Leading experts in entomology, ecology, plant reproductive biology, genomics, prediction and economics have joined forces to explore the full scope of the pollination problem.

Contact: Peter Kevan, Director, Ext. 52479

CANADIAN RESEARCH INSTITUTE IN FOOD SAFETY (CRIFS)

Fosters links among researchers, the food industry, consumer groups and regulatory agencies to bolster the Canadian agri-food sector through public health protection, enhancement of trade and increased awareness of food safety.

Contact: Jeff Farber, Ext. 56101

CARDIOVASCULAR CENTRE

A collaborative venture between laboratories in the Ontario Veterinary College, College of Biological Sciences and Human Health & Nutritional Sciences. With broad interests that span the spectrum of cardiovascular medicine and science, they work to understand the mechanisms behind heart disease and to develop new therapies for the treatment of cardiovascular disease.

Contact: Tami Martino, Director, Ext. 54910

CATALYST CENTRE

Commercializes University of Guelph ideas and inventions through license activity and start-ups. The Industrial Liaison Program helps businesses access the University's intellectual capital and state-of-the-art research facilities to create strategic partnerships that drive innovation.

Contact: Administrative Office, Ext. 58878

CENTRE FOR AGRICULTURAL RENEWABLE ENERGY AND SUSTAINABILITY

Agricultural focus with the objectives of strengthening the agricultural sector, improving sustainability and development, increasing alternative energy and energy conservation, and leveraging education, training and research.

Contact: Rob Nicol, Ridgeway, 519-674-1500 Ext. 63641

CENTRE FOR BUSINESS AND SOCIAL ENTREPRENEURSHIP (CBASE)

A social enterprise with a social agenda that offers experimental learning on a university platform. The CBase represents and work with all departments across the College of Management and Economics. CBase is dedicated to offering transformational learning experiences by way of applied business projects for credit that enable the collaboration of faculty and students with industry leaders in the local community.
Contact: Melanie Lang, Director, Ext. 52239

CENTRE FOR FAMILIES, WORK AND WELL-BEING
 Promotes individual and family well being through research, consulting and community education.
Contact: Donna Lero, Director, Ext. 53914

CENTRE FOR FOOD AND SOFT MATERIALS SCIENCE
 Researches the use and development of soft materials such as food, polymers, biological membranes and proteins of critical importance to all sectors of industry.
Contact: John Dutcher, Ext. 53950

CENTRE FOR LAND AND WATER STEWARDSHIP
 Encourages projects that examine the sustainability of land and water resources, and serves as an umbrella for several research and extension projects at the University.
Contact: Robert Corry, Director, Ext. 58034

CENTRE FOR NUTRITION MODELLING
 Focuses on animal nutrition and developing biomathematical models to better understand the scientific and management aspects of animal agriculture.
Contact: James France, Director, Ext. 52209

CENTRE FOR PSYCHOLOGICAL SERVICES
 Provides psychological services to the university and local community and promotes the profession of psychology to students, U of G and the community.
Contact: Melanie Parkin, Director, Ext. 52826

CENTRE FOR PUBLIC HEALTH AND ZOOSES
 Co-ordinates existing public health research and promotes new collaborative research activities designed to enhance problem-solving capacity and implement solutions in public health at the human-animal-environment interface.
Contact: Jan Sargeant, Director, Ext. 54045

CENTRE FOR SCOTTISH STUDIES
 Co-ordinates graduate studies and scholarly research in the history, literature and culture of Scotland and Scottish settlements in Canada, promoting public outreach and development of the University's renowned Scottish archival collection.
Contact: Heather Parker, Ext. 58064

CENTRE FOR THE GENETIC IMPROVEMENT OF LIVESTOCK
 Conducts genetic and genomic research for numerous animal industries, including aquaculture, beef, dairy, equine, poultry, sheep and swine.
Contact: Flavio Schenkel, Director, Ext. 58650

CONTROLLED ENVIRONMENT SYSTEMS RESEARCH FACILITY
 Conducts multidisciplinary research and development in space and earth sciences.
Contact: Michael Dixon, Director, Ext. 52555

CO-OPERATIVE EDUCATION AND CAREER SERVICES
 Supports, trains and leads students and alumni as they make career and further education planning decisions. Student placements and internships headquarters.
Contact: Karen Reimer, Director, Ext. 52423

COUPLE AND FAMILY THERAPY CENTRE
 Serves a wide range of clients with diverse problems and provides students with research and clinical experience.
Contact: Lynda Ashbourne, Director, Ext. 54237

ELECTROCHEMICAL TECHNOLOGY CENTRE
 A team of researchers from chemistry and physics (University of Guelph) and chemical engineering (University of Waterloo) who conduct research in a variety of areas of pure and applied electrochemistry.
Contact: Jacek Lipkowski, Director, Ext. 58543

FOOD INSTITUTE

The Food Institute tackle's global issues in all aspects of food — production, safety, security, and the impact of food on culture, economies and the environment, through research, innovation, commercialization and action.

Contact: *Evan Fraser, Ext. 53011*

G360 CENTRE FOR APPLIED GROUNDWATER RESEARCH

A field-focused groundwater research group with global collaboration in 11 countries, where principal investigators oversee more than 150 academic experts supported by more than 25 multinational corporations and industrial sponsors, as well as all levels of government contributing more than \$8 million/year.

Contact: *Beth Parker, Ext. 53642*

GOSLING RESEARCH INSTITUTE FOR PLANT PRESERVATION (GRIPP)

Focuses on developing international, interdisciplinary research and educational programs for the conservation of endangered plant species through conventional and biotechnology based strategies.

Contact: *Praveen Saxena, Director, Ext. 52495*

GUELPH-WATERLOO CENTRE FOR GRADUATE WORK IN CHEMISTRY AND BIOCHEMISTRY (GWC2)

GWC2 is one of Canada's largest and most successful graduate schools, housed in the Chemistry departments at the Universities of Guelph and Waterloo, two of Canada's highest rated universities. A diverse team of world-class faculty from both departments provides research opportunities in a myriad of chemical and biochemical research areas.

Contact: *Guy Guillemette, Director, Ext. 53848*

GUELPH TURFGRASS INSTITUTE (GTI)

Conducts research and extension, and provides information on turfgrass production and management, urban horticulture and environmental research to the Ontario turfgrass and landscape industries as well as the Ontario public..

Contact: *Eric Lyons, Ext. 52232*

HAGEN AQUALAB

Provides state-of-the-art facilities for a broad range of aquatic research programs with practical applications in areas of aquaculture, ecological conservation, toxicology, physiology, evolutionary biology.

Contact: *Matt Cornish, Coordinator, Ext. 52714*

HEALTH AND PERFORMANCE CENTRE

Specializing in sports medicine and health promotion. Services available to the university and surrounding communities. Multidisciplinary staff includes sports medicine physicians, chiropractor, dietitians and fitness consultants.

Contact: *Alison Burnett, Director, Ext. 54333*

HONEY BEE RESEARCH CENTRE

Uniquely qualified to investigate declining populations of honey bees and to provide solutions. Expertise also includes honey bee breeding and genetics.

Contact: *Dr. Ernesto Guzman, Head of the Centre, x53609*

HUMAN NUTRACEUTICAL RESEARCH UNIT

A clinical trial unit that evaluates natural health products, dietary supplements and value-added novel foods in controlled human studies for potential health claims.

Contact: *Amanda Wright, Director, Ext. 54697*

COMMUNITY ENGAGED SCHOLARSHIP INSTITUTE (CESI)

The Community Engaged Scholarship Institute (CESI)) fosters collaborative and mutually beneficial community-university research partnerships. CECI builds capacity for community-engaged scholarship by strengthening faculty and student engagement with local, national and international communities of interest, addressing faculty reward development, and training faculty and students in knowledge mobilization. The Research Shop serves as a portal between community and university research needs. Faculty and students work with community organizations and individuals to identify and address social problems, and develop policies for positive change. Currently, the Research Shop focuses on working with collaborations in Guelph and Wellington by developing community-based research, placing students for service learning, and knowledge mobilization.

Contact: *Linda Hawkins, Director, Ext. 53109*

INSTITUTE FOR COMPARATIVE CANCER INVESTIGATION

The Institute for Comparative Cancer Investigation (ICCI) at the University of Guelph is dedicated to providing comprehensive cancer care for companion animals and unlocking the deadly secrets of the disease for the benefit of all species, including humans.

Contact: Dr. Paul Woods, co-director, ext. 54092

INTERNATIONAL INSTITUTE FOR CRITICAL STUDIES IN IMPROVISATION

The next generation of Guelph's award-winning Improvisation, Community, and Social Practice (ICASP) project, an international research collaboration that uses musical improvisation as a model for building successful communities.

Contact: Ajay Heble, Director, Ext. 53445

LANDSCAPE ARCHITECTURE COMMUNITY OUTREACH CENTRE

Offers design assistance directly to communities, organizations and individuals with the goal of stimulating creative and innovative approaches to solving design problems.

Contact: Nathan Perkins, Coordinator, Ext. 59758

MATHEMATICS OF INFORMATION TECHNOLOGY AND COMPLEX SYSTEMS

A Canada-wide network of 174 researchers that provides mathematical models and software tools to help Canadian firms in key sectors of the economy become more productive.

Contact: Anna Lawniczak, Mathematics and Statistics, Ext. 53287

NUCLEAR MAGNETIC RESONANCE CENTRE

Brings together extensive expertise in materials research spanning 19 different research groups that address a wide range of research into the structure-function relationships on different scales of foods, polymers and biopolymers, and biological membranes.

Contact: Dr. Vladimir Ladizhansky, Director, Ext. 53989

NSF- GUELPH FOOD TECHNOLOGY CENTRE (NSF-GFTC)

Canada's only independent technology transfer centre specializing in food, uniting industry, government, labour and the University of Guelph.

Contact: Petra Schennach, Global Managing Director 519-821-1246

ORGANIZATION AND MANAGEMENT SOLUTION

Specialists in the theory, research and practices of applied psychology use the latest knowledge to provide practical solutions in human resources management.

Contact: 519-767-5071

ONTARIO RURAL WASTEWATER CENTRE

Promotes environmentally sustainable development of rural and unsewered areas through training, demonstration and applied research on nutrient and agri-food waste management and rural municipal waste-water treatment.

Contact: Doug Joy, General Manager, Ext. 54687

PHYSICAL SCIENCE AND ENGINEERING EDUCATION RESEARCH CENTRE (PSEER)

Promotes discipline-based education research in engineering, computing, mathematical and physical sciences, to improve the effectiveness of teaching and to contribute to a better understanding of learning processes in these disciplines.

Contact: Daniel Thomas, Director, x53961

RESEARCH PARK

In 1986, the University of Guelph created a Real Estate Division, to establish and manage a land development program for its surplus lands. The Real Estate Division reports regularly to the Real Estate Development Committee of the University's Heritage Fund Board of Trustees, and ultimately to the Board of Governors. The University will retain the residual ownership of all lands where practical. Leasing of current buildings is available in Research Park South while greenfield opportunities are available in the newly serviced Research Park North. Current tenants include many Canadian headquarters for multinational corporations that enjoy a close working relationship with the University.

Contact: Kimberley Powell, 519-767-5014 Ext. 55014

RESEARCH PROGRAMS (OMAFRA-U OF G PARTNERSHIP)

Furtheres the long-term global competitiveness and sustainability of Ontario's agriculture and food system through excellence in research.

Contact: Wayne Caldwell, Interim Associate Vice President, Research (Strategic Partnerships), 519-826-3800

THE PHYSICAL SCIENCE AND ENGINEERING EDUCATION RESEARCH CENTRE (PSEER)

Promotes discipline-based education research in engineering, computing, mathematical and physical sciences to improve the effectiveness of teaching and to contribute to a better understanding of learning processes in these disciplines.

Contact: Daniel Thomas, Director, Ext. 5396

THE ROBOTICS INSTITUTE OF GUELPH

Develops intelligent systems that can perceive, reason and act in areas such as natural resources, health care, manufacturing and information technology.

Contact: Medhat Moussa, Director, Ext. 53425

SHARED HIERARCHICAL ACADEMIC RESEARCH COMPUTING NETWORK (SHARCNET)

A multi-institutional, interdisciplinary high performance computing consortium dedicated to research and development of computational techniques and HPC for advancing science, engineering and business.

Contact: Deborah Stacey,
Computing & Information Science, Ext. 52250

VETERINARY TEACHING HOSPITAL

Provides clinical training of undergraduate DVM students and graduate students as well as essential services to veterinarians and animal owners in Ontario.

Contact: OVC Dean's Office Ext. 54401

WEATHER INNOVATION CENTRE

Specializes in building turnkey monitoring and modelling solutions for individual commodity groups and agencies. Aims to make weather-based modelling much easier to use at the farm level, and to bring the best information from the information supply chain into practice.

Contact: Ian Nichols, President, 519-352-5334
